

AGN. NO. _____

MOTION BY SUPERVISOR MICHAEL D. ANTONOVICH

AUGUST 10, 2010

EXPANDED WATER STUDY REPORT

On October 10, 2000, the Los Angeles County Board of Supervisors instructed the Environmental Toxicology Laboratory of the Agricultural Commission/Weights and Measures Department to conduct an expanded study to the water in all County facilities under the jurisdiction of the Los Angeles County Department of Public Health and all County agencies for the presence of total chromium, hexavalent chromium, lead, and arsenic.

It has been ten years since the last water quality study has been undertaken and it is integral that the County continue to monitor and review the analytical results and compare them to the historical data reported to the Department at the same sampling locations.

I, THEREFORE, MOVE that the Board of Supervisors direct the Environmental Toxicology Laboratory of the Agricultural Commission/Weights and Measures to repeat the same study of the water in all County facilities to determine the drinking water quality and to indentify trends and changes in the above list of water chemical level from 2000-2010 and report back to the Board in 45 days.
